

FIVE-AXIS ADJUSTABLE SELF-CENTERING VISE ASC-77x130S

\$1,188 each

1. Vise body is made of **High quality Tool Steel**. The sideways are high frequency through hardened to 50 HRC for improved durability.
2. Detachable jaws are made of **High quality Tool Steel** carburized to **55HRC**. Since both jaws are fixed size they can be used as a datum. Users can reverse the jaws to increase the clamping range. **Four-bolt** fixation of the jaws eliminates jaw lift.
3. The vise's clamping force can achieve **1300KG**, the repeatability positioning precision of its clamping center is within **0.015mm**.
4. Users can calibrate the clamping center of vise by adjusting the screws on both ends.
5. The **45° dovetail structure with teeth** on the upper jaw ensures the bottom of the workpiece to be firmly clamped.

SPECIFICATIONS (Material: Vise body S50C: HRC50° / Detachable Jaws SCM440: HRC55°)
